

## Identi-Plugs

### High Density breathable foam stoppers

Identi-Plugs have been used in labs for over 40 years as breathable plugs. They leave no clinging fibers like cotton. They provide a snug barrier, but permit free air flow. They spring back to the original shape after each use. They have been used as a cleaner for lab pipettes, tubes, vials as well as industrial precision tubing. If you need a breathable plug look no further Identi-Plugs are the industry standard.
