OVERALL BROCHURE CONSTANT TEMPERATURE EQUIPMENT 2019/2020

°FAHRENHEIT. °CELSIUS. °LAUDA.

THE COMPLETE SPECTRUM OF PERFECT TEMPERATURE CONTROL.

LAUDA is the world's leading provider of high-precision temperature control with liquids. We have satisfied customers worldwide with professional expertise and environmentally friendly concepts time and again for over 60 years. In our company, we always go one step further: We encourage our employees to share their ideas and create space for technical innovation and creative solutions, winning over new markets and customer segments.

LAUDA

A world market leader with tradition

| | | |
|-------------|--|--|
| 1956 | The first year | Dr. Rudolf Wobser founds Messgerätewerk Lauda Dr. R. Wobser KG in the small town of Lauda in Baden. |
| 1964 | The first industrial systems | Since 1964, LAUDA has also been building industrial heating and cooling systems for technology centers and production. |
| 1967 | The first measuring instruments | Market launch of pioneering LAUDA innovations: such as the first tensiometer and first film weighing scales. |
| 1977 | Dr. Gerhard Wobser and Karlheinz Wobser take over the management | After their father's death, the two brothers take up the role of Managing Director and share responsibilities accordingly. |
| 1982 | The first thermostat with a microprocessor | LAUDA introduces the world's first thermostats featuring microprocessor technology and invents features such as proportional cooling and external control. |
| 1989 | The first year under today's company name | Renaming of company with expansion of product range: from Messgerätewerk Lauda Dr. R. Wobser KG to LAUDA DR. R. WOBSEER GMBH & CO. KG. |
| 2003 | Dr. Gunther Wobser appointed Managing Director | Karlheinz Wobser retires. Dr. Gunther Wobser, at LAUDA since 1997, becomes the new Managing Director. |
| 2005 | Subsidiary LAUDA France | First subsidiary LAUDA France is founded to support and advise customers and agencies on the market. |
| 2006 | 50 years of LAUDA | LAUDA celebrates its 50th anniversary on March 1, 2006. |
| 2008 | Global expansion phase with new subsidiaries | LAUDA America Latina C.A., LAUDA China Co. Ltd. and LAUDA-Brinkmann, LP, USA, are founded. |
| 2010 | Dr. Gerhard Wobser resigns | His son, Dr. Gunther Wobser, takes over his duties. |
| 2011 | Acquisition of LAUDA Ultracool | LAUDA expands its product range with industrial circulation chillers by acquiring LAUDA Ultracool S.L. in Barcelona. |
| 2013 | New building | Opening of a new logistics center and production hall. |
| 2014 | Expansion LAUDA-Noah | LAUDA buys US company Noah Precision and expands the product range with thermo-electric thermostats. |
| 2015 | Independent company for measuring devices | The new subsidiary LAUDA Scientific takes over development, sales and service activities for LAUDA measuring. |
| 2016 | LAUDA celebrates its 60th birthday | On March 1, 2016, LAUDA celebrated its 60th company anniversary. |
| 2017 | Progress with Peltier technology | An innovative thermo-electric circulation thermostat, the LAUDA LOOP, enables location-independent temperature control. |
| 2018 | New branding for LAUDA | LAUDA is introducing a confident new corporate design with a redesigned logo and new slogan. |
| 2019 | Acquisition of GFL and new device design | With the purchase of traditional company GFL Gesellschaft für Labortechnik, LAUDA is expanding its expertise in the field of lab temperature control. At the same time, LAUDA is setting new benchmarks in device design with the introduction of the new Integral product line. |

RESEARCH AND DEVELOPMENT LABORATORIES

In research and development, temperature control is particularly important in the areas of sample preparation and quality assurance. As part of the sample preparation, a pre-tempering takes place in many cases. Many processes in quality assurance require the observance of a defined temperature or the targeted change of the temperature in a defined time.

Typical applications

- Sample preparation
- Quality assurance
- Research laboratory

AUTOMOTIVE

Temperature control in the automotive sector is mainly found in test benches and material tests. All components of the automobile are exposed to particularly high temperature fluctuations. Great importance is attached to component testing on special test benches. The simulation of environmental conditions such as high or low temperatures is an important part of material testing.

Typical applications

- Test bench applications
- Material testing

BIOTECHNOLOGY

In biotechnology, temperature control is essential to the quality of research and production results. Constant temperatures in the operation of bioreactors contribute significantly to the success of the products. As part of sample preparation, there are a variety of work steps that require reliable temperature control.

Typical applications

- Bioreactors
- Sample preparation

CHEMISTRY

In the chemical industry, there are many processes where temperature control plays an important role, including reactor temperature control and process engineering. At tempering processes in reactors, applications such as chemical reactions, syntheses, production of drug substances, polymerizations or crystallizations take place.

Typical applications

- Reactor temperature control
- Process engineering

PHARMACEUTICAL INDUSTRY

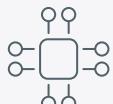

In the pharmaceutical industry, the temperature control processes range from research to production scale. To obtain high-quality reaction products, temperature control systems must reliably control the process sequence in an external reactor.

Typical applications

- Reactor temperature control
- Process engineering

SEMICONDUCTOR INDUSTRY

In the production of semiconductors and the testing of electronic components, there are numerous processes that must be exactly tempered. These include, for example, the organometallic chemical vapor phase deposition (MOCVD) in semiconductor coating as a precursor of LED production. Other typical temperature-dependent investigations in the semiconductor industry include stress tests for function and load testing, environmental simulations, and in-circuit tests of electronic assemblies.

Typical applications

- Process cooling
- Component testing

AEROSPACE

Temperature simulations and temperature-dependent material tests are an important component in the aerospace industry. Cyclic temperature stress tests ensure that a trouble-free usage of the components used is always ensured, even under extremely fluctuating external conditions in space.

Typical applications

- Material testing
- Temperature simulation

MEDICAL TECHNOLOGY

In medical technology, temperature control is found primarily in the laboratory for sample preparation and in medical devices such as imaging machines, medical lasers or devices used in pharmaceutical and medical laboratories.

Typical applications

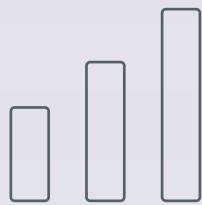

- Medical laboratory
- Medical device

LAUDA Group

The essential facts

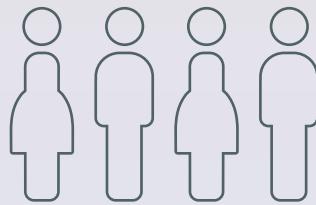

For more than 60 years, we have been the only company in the world to guarantee the perfect temperature in research, application technology and production for more than 10,000 customers with our 500 employees, a turnover of more than 90 million euro and twelve subsidiaries overseas. LAUDA quality products control temperature with up to 400 kilowatts of cooling capacity and maintain constant temperatures or heat to the nearest five-thousandth of a °C within a range of -150 to 550 °C.

CONSTANT TEMPERATURE EQUIPMENT

From water baths to high-performance process thermostats: LAUDA thermostats are characterized by their excellent handling, highly ergonomic design and intuitive operation and provide a working temperature range from -100 to 320 °C.

HEATING AND COOLING SYSTEMS

Heating and cooling to the accuracy of a tenth degree in a temperature range from -150 to 550 °C: with tailor-made systems for industrial applications according to modular engineering principles.

SERVICE

High product quality and comprehensive professional services form an inseparable unit at LAUDA. Regular care, service and maintenance by highly qualified LAUDA service specialists ensures the high performance of your LAUDA devices.

ORIGINAL EQUIPMENT MANUFACTURER

Customer-specific advice with corresponding instrument selection and development of individual temperature control solutions for an optimum cost-benefit ratio with decades of successful partnerships.

LAUDA SCIENTIFIC

Reliable measuring instruments for the high-precision analysis of polymers, plastics, oils and surfactants – precisely tuned to the current needs of customers and the market.

GFL – GESELLSCHAFT FÜR LABORTECHNIK

GFL has been known as a premium manufacturer of laboratory technology for more than 50 years. Its comprehensive portfolio, ranging from deep freezers to incubators, is used in research, routine and special laboratories in medicine, science and industry.

LAUDA WINS OVER: WITH PRODUCTS, SAFETY AND SERVICE – AND PEACE OF MIND.

Large selection

Whether it's for routine tasks, professional and economical temperature control, high cooling outputs and high cooling rates or lightning-fast temperature changes – LAUDA has the right solution for almost every requirement.

Exemplary safety concepts

All products meet the most stringent safety requirements and provide peace of mind in every application, thanks to the intelligent technologies and sophisticated safety concepts.

Easy handling

All LAUDA devices are characterized by excellent handling, a highly ergonomic design and intuitive operation. They also offer maximum user convenience and future-oriented software.

First-class advice – internationally

The LAUDA team provides friendly, fair, and expert advice. LAUDA application experts help customers worldwide to configure application-optimized systems.

Proverbial quality

For more than 60 years, LAUDA has been developing, designing and producing high-quality constant temperature equipment to the highest standards in quality and safety – confirming time and again the durability and longevity that LAUDA has become known for.

Reliable service

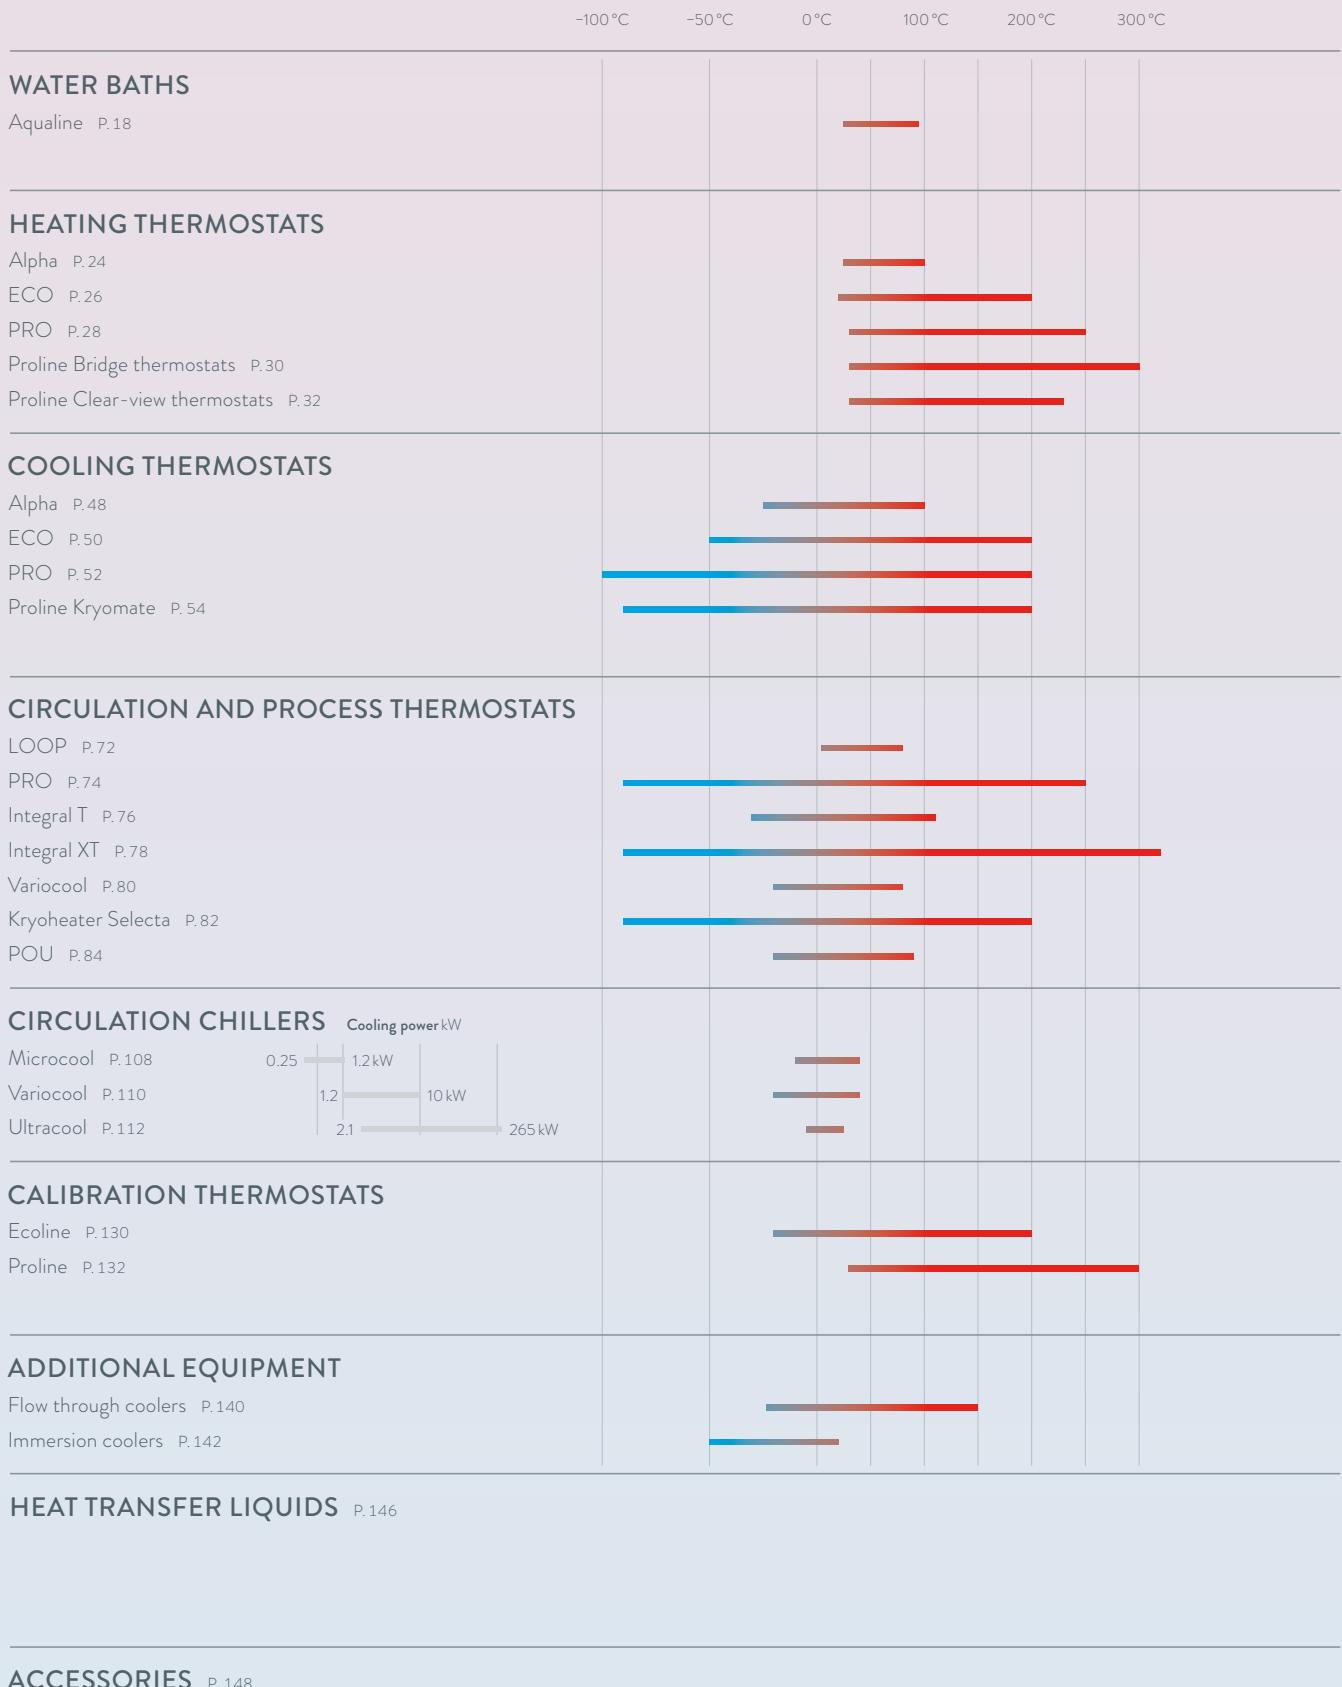

Robust LAUDA devices are known for their durability. If you still need additional support, we will not let you down: with quick access to comprehensive services – for greater flexibility and cost-efficiency.

Circulation and process thermostats

Circulation chillers

Add. equipment

Heat transfer liquids

Accessories

LAUDA Aqualine

Universal water baths from 25 to 95 °C for the lab

Reliable and ergonomic water baths

Cost-effective, compact water baths for basic use in the lab, LAUDA Aqualine is sure to impress with its ease of operation made possible by digital LED display and high reliability. With maximum usable space and no obstructions in the bath, the devices are easy to clean or disinfect. The panel heating elements installed under the bath vessel ensure homogeneous temperature distribution without local overheating.

Full use of the bath and easy cleaning of the inner chamber, thanks to the lack of obstructions in the bath vessel

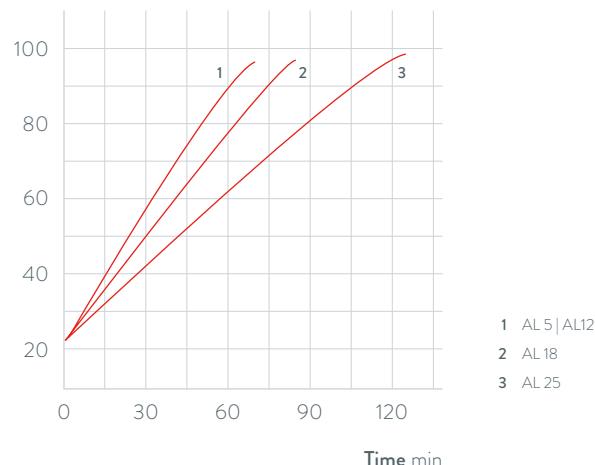

Removable, transparent gable cover

HEATING PERFORMANCE

Heat transfer liquid: Water, bath closed

Bath temperature °C

1 AL 5|AL12

LAUDA Aqualine

The four different water bath sizes of the LAUDA Aqualine, made of deep-drawn stainless steel without obstructions, offer optimum utilization of the inner space and a maximized sample count per bath. It offers the perfect bath depth or opening for every application, regardless of the sample size and quantity. The patented heating concept allows Aqualine baths to achieve outstanding temperature homogeneity and make them especially well-suited to the needs of biological, medical, or biochemical labs.

LAUDA Alpha

Heating thermostats from 25 to 100 °C for cost-effective temperature control thermostating in the lab

25°C —————— 100°C

Cost-effective thermostats with reliable technology incorporated into a modern design

LAUDA Alpha is the most cost-effective choice when it comes to premium-quality LAUDA thermostats. These reliable and user-friendly thermostats, with features optimized to the essentials, can be operated with non-flammable liquids and are suitable for both internal and external temperature control tasks.

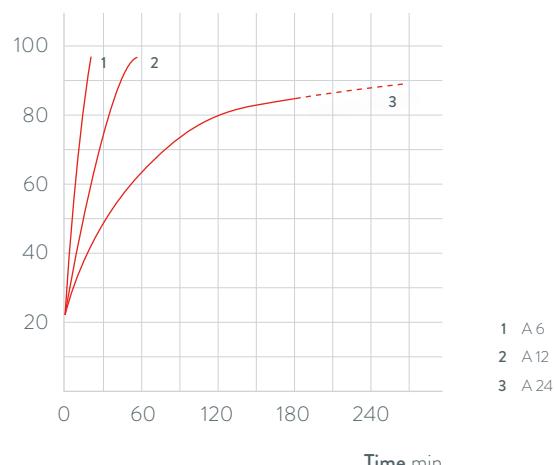

Simple and intuitive menu navigation with three-button operation using a large, clearly legible LED display

Screw clamp allows easy change to different bath vessels with a maximum wall thickness of 30 mm

HEATING PERFORMANCE Water, bath closed

Bath temperature °C

- 1 A6
2 A12
3 A24

Important functions

- Deep-drawn stainless steel bath vessels
- Integrated timer function allows automatic device shutdown
- Low-level and overtemperature protection for operation with non-flammable liquids

Included accessories

Screw clamp, attachment nozzle in two sizes

Further accessories

Pump circulation set, cooling coil, bath cover set

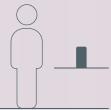

All technical data and power supply variants can be found in the [Technical data](#) section.

More at www.lauda.de/1724

LAUDA Alpha

Heating thermostats A6, A12 and A24 work in the temperature range between 25 and 100 °C. Cooling coil, pump circulation set and bath cover set are available as accessories for all thermostats.

LAUDA ECO

Heating thermostats from 20 to 200 °C
for economic temperature control in the lab

Economic and high-performance temperature control

The ECO thermostats come in Silver (LCD display) or Gold (color TFT display) models, equipped with a mini USB interface as standard. The circulation pump can be adjusted to six levels. The ECO heating thermostat line encompasses transparent baths up to 100 °C as well as immersion thermostats and heating thermostats with stainless steel baths up to 200 °C.

Plain text menu navigation on a monochrome LCD (Silver) or color TFT display (Gold) for easy operation

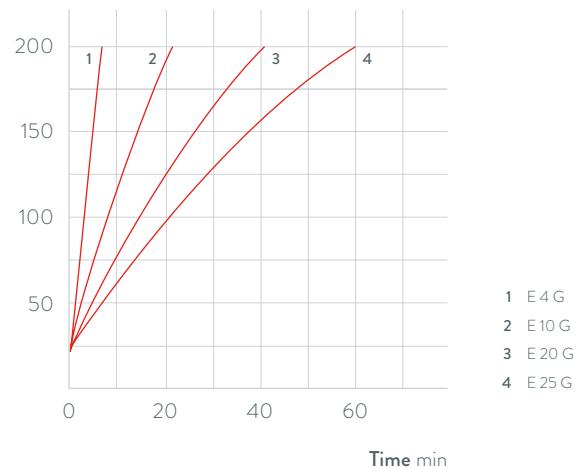

Standard-issue cooling coil included with all heating thermostats

HEATING PERFORMANCE

Heat transfer liquid: Therm 240, bath closed

Bath temperature °C

Important functions

- Integrated programmer for automating temperature profiles
- Adjustment of flow rate switch for internal/external circulation, can be controlled from exterior during operation
- Can be upgraded with Pt100/LiBus module for external control

Included accessories

Cooling coil, bath cover and pump connections (with E 4)

Further accessories

Tubing, bath cover, pump connection set, interface modules

All technical data and power supply variants can be found in the 'Technical data' section.

More at www.lauda.de/1726

LAUDA ECO

Bath thermostats come equipped with a cooling coil as standard. The E 4 is also equipped with a bath cover and pump connections for external application connections. A drain tap on the back side of the device makes changing the heat transfer liquid in the stainless steel baths easy and safe.

LAUDA PRO

Heating bath thermostats from 30 to 250 °C
for professional temperature control

Flexible operation, outstanding performance characteristics

LAUDA PRO is the cutting-edge product line with an outstanding overall concept: The innovative Base or Command Touch operating units can be detached and used as a remote control. Heating bath thermostats come equipped with a cooling coil as standard.

Low device height and 360° accessibility of the bath thanks to detachable remote control

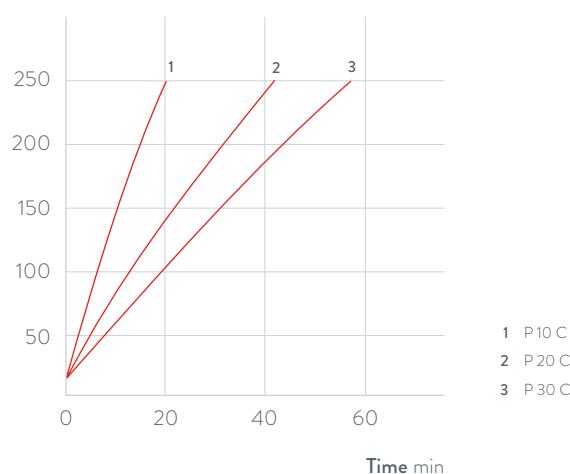

Draining tap on the front of the device

HEATING PERFORMANCE

Heat transfer liquid: Ultra 300, bath closed

Bath temperature °C

Important functions

- Ethernet and USB interface and Pt100 connection as standard
- Operated via Base operating unit with OLED display or Command Touch with color touch screen
- Stainless steel bath vessels (insulated with handles and drain tap)
- Internal LAUDA Vario Pump with 8 selectable output levels

Included accessories

Bath cover, tubing nipples with screw caps for the cooling coil

Further accessories

External pump, interface modules

All technical data and power supply variants can be found in the 'Technical data' section.

More at www.lauda.de/1728

LAUDA PRO

The PRO heating bath thermostats P10, P 20 and P 30, with volumes of 10, 20 and 30 liters, function up to a maximum temperature of 250 °C and their excellent temperature stability make them perfect for internal bath applications.

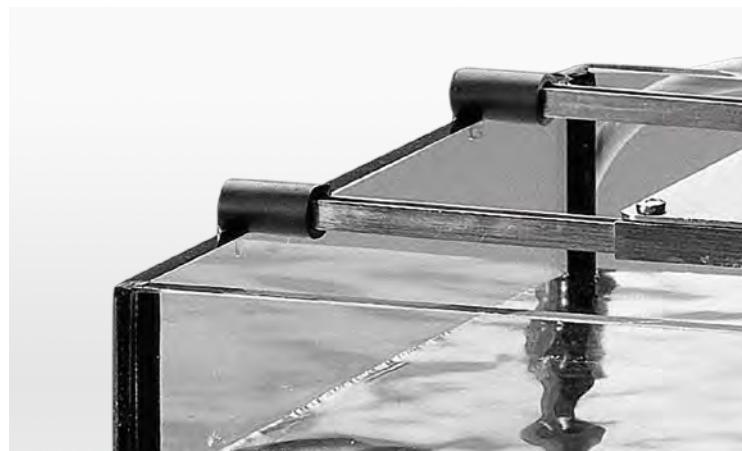

LAUDA Proline bridge thermostats

Bridge thermostats 30 to 300 °C
for temperature control of any bath

Intuitive operation with broad temperature range

The LAUDA Proline bridge thermostats with vario flex pump are great for temperature control of any bath vessel. The PB models have a pressure/suction pump, but the PBD models are equipped with stronger pressure pumps. They enable temperature control on deeper baths of up to 320 mm. A telescoping rod for baths with a width of 310 to 550 mm, an ergonomic handle and side pump connections are also available.

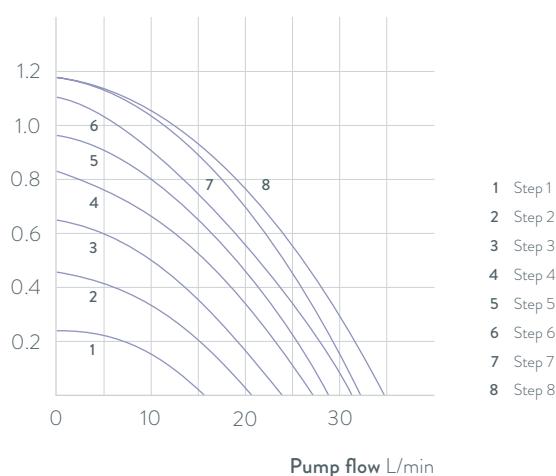

Extendable telescoping rods for placement on baths with widths of 310 to 550 mm

Removable Command remote control unit for easy and intuitive operation

PUMP CHARACTERISTICS for PB and PBC, Liquid: Water

Pressure bar

- 1 Step 1
- 2 Step 2
- 3 Step 3
- 4 Step 4
- 5 Step 5
- 6 Step 6
- 7 Step 7
- 8 Step 8

Important functions

- Programmer with 150 temperature/time segments and graphical temperature display with Command control unit
- PowerAdapt system for optimally adapted max. heating output without influencing the mains power supply
- Low-level protection and adjustable overtemperature protection with acoustic alarm. Float for identifying low or high level

Included accessories

Tubing nipples for pump connection, telescoping rod

Further accessories

Automatic filling device, bath vessels, interface modules

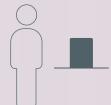

All technical data and power supply variants can be found in the 'Technical data' section.

More at www.lauda.de/1730

LAUDA Proline bridge thermostats

LAUDA Proline bridge thermostats are available with two different control units. The master version is designed for all applications in which the parameters are not changed very often. The removable Command operating unit offers a graphic LCD screen for high operating convenience and an additional programmer.

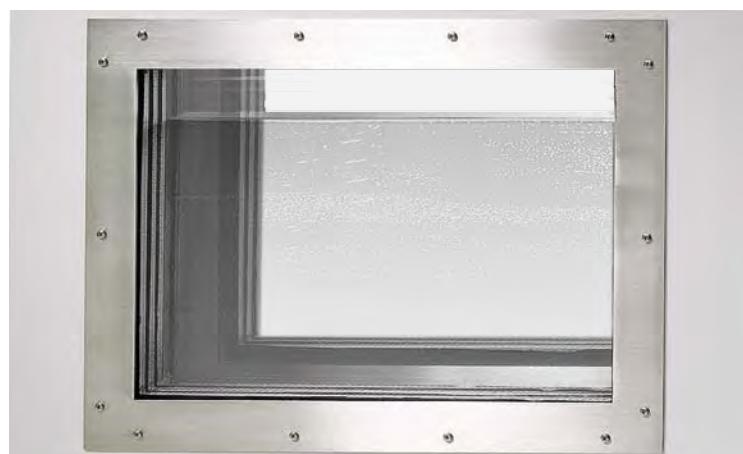

LAUDA Proline clear-view thermostats

Heating clear-view thermostats from 30 to 230 °C for professional use in research, application technology and production

A clear view of the object at all times

LAUDA clear-view thermostats are optimized for direct observation of objects. They are ideal for use with the fully automatic LAUDA viscometer PVS or iVisc, since the temporal and spacial temperature stability necessary for precise determination of viscosity is guaranteed across the whole temperature range. Furthermore, the two-chamber principle ensures a constant liquid level in the measuring chamber at all times, regardless of the fluid volume and temperature. The PVL models with five layers of insulated glass are suitable for low temperature measurements down to -40 or -60 °C when a flow through chiller or cooling thermostat is connected.

Insulated glass makes it possible to observe samples, even at very low temperatures

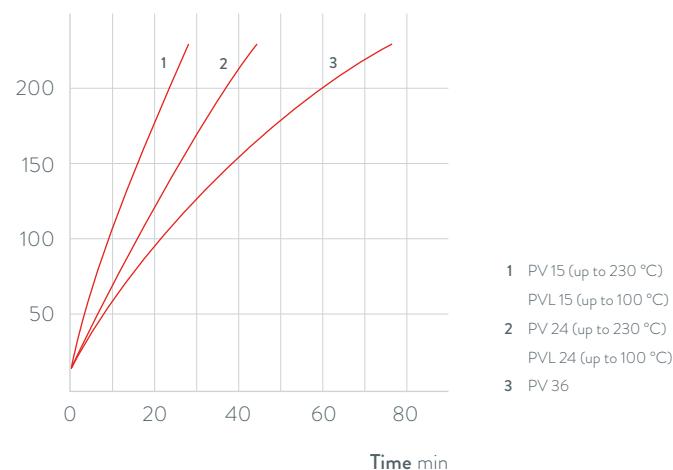

Removable Command remote control unit for easy and intuitive operation

HEATING PERFORMANCE

Heat transfer liquid: Therm 240, bath closed

Bath temperature °C

- 1 PV15 (up to 230 °C)
PVL 15 (up to 100 °C)
- 2 PV24 (up to 230 °C)
PVL 24 (up to 100 °C)
- 3 PV36

Important functions

- Programmer with 150 temperature/time segments and graphical temperature display with Command control unit
- LAUDA Vario Flex pump (pressure pump) with eight selectable output levels
- Cooling coil fitted as standard allows connection of an additional cooler

Included accessories

Tubing nipples for pump connection and cooling coil

Further accessories

Solenoid valve for cooling water, additional cooler, interface modules

All technical data and power supply variants can be found in the [Technical data](#) section.

LAUDA COOLING THERMOSTATS

Specific application examples

-
- Sample preparation in chemistry and pharmacy
 - Functional testing of electronic components
 - Test of slide bearings
 - Beer forcing test
 - Valve testing
 - Stress test
 - Notch bending test
 - Expansion testing
 - Brookfield test
 - Semi-conductor coating

LAUDA Alpha

Affordable cooling thermostats for maintaining temperatures from -25 to 100 °C in the lab

The cost-efficient choice for high-quality LAUDA thermostats

LAUDA Alpha offers reliable technology for temperature ranges from -25 to 100 °C. This line of devices is suitable for internal and external temperature control thermostating with non-flammable liquids (water and water/glycol). The thermostats are the perfect solution for most basic temperature control applications in the lab. Optimized down to the most essential functions, this affordable product line will win you over with its reliability and user-friendliness.

Cost savings through automatic compressor control: Cooling capacity is only provided when it is needed

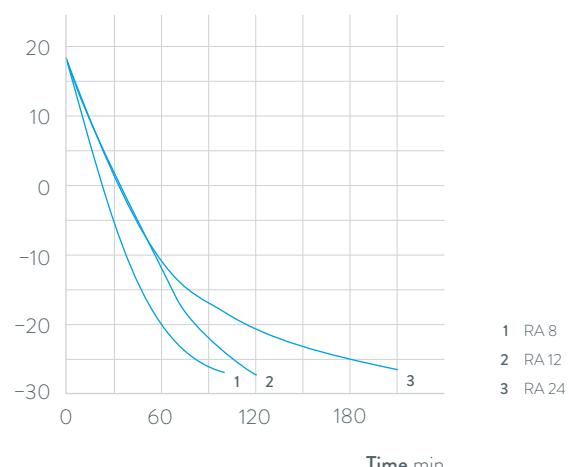

Easy cleaning of the cooling air inlet enabled by simple removal of front cover without tools

COOLING PERFORMANCE

Heat transfer liquid: Ethanol, bath closed

Bath temperature °C

Important functions

- Stainless steel bath vessels
- Drain connection at the rear

Included accessories

Pump circulation set, bath cover, pump link for pump connections

Further accessories

Racks, tubing

All technical data and power supply variants can be found in the [Technical data](#) section.

More at www.lauda.de/1736

LAUDA Alpha

The cooling thermostats RA 8, RA 12 and RA 24, including standard-issue bath covers and pump connections, facilitate cooling across the entire temperature range from -25 to 100 °C. Automatic compressor control extends the service life of the compressor and offers savings on operation costs.

LAUDA ECO

From -50 to 200 °C: Cooling thermostats
for economic temperature control in the lab

Impressive range of capabilities coupled with easy operation

The ECO thermostats are available in standard Silver (LCD) or Gold (color TFT display) models equipped with a mini USB interface. The circulation pump can be adjusted to six levels. The comprehensive model portfolio offers devices with cooling capacities of 180 to 700 watts and minimum temperatures of -15 to -50 °C. The devices of the LAUDA ECO series with the highest performance work with an energy-saving LAUDA SmartCool system which automatically adjusts the cooling capacity to the required operating condition.

Plain text menu guidance on a monochrome LCD (Silver) or color TFT display (Gold) for easy and intuitive operation

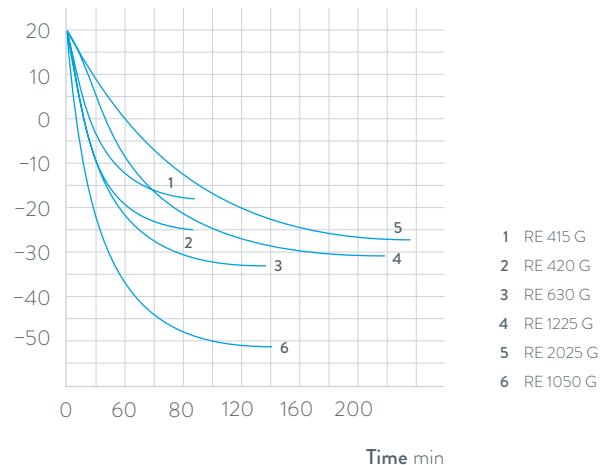

Standard pump connections for temperature control of external applications

COOLING PERFORMANCE

Heat transfer liquid: Ethanol, bath closed

Bath temperature °C

- 1 RE 415 G
- 2 RE 420 G
- 3 RE 630 G
- 4 RE 1225 G
- 5 RE 2025 G
- 6 RE 1050 G

Important functions

- Integrated programmer for automating temperature profiles
- Adjustment of flow rate switch for internal/external circulation, can be actuated from exterior during operation
- USB interface as standard

Included accessories

Bath cover, pump connections, closing plugs

Further accessories

Tubing, interface modules

All technical data and power supply variants can be found in the 'Technical data' section.

More at www.lauda.de/1738

LAUDA ECO

The cooling thermostats come with a bath cover and pump connections as standard. A drain tap on the back side of the device makes changing the heat transfer liquid easy and safe.

LAUDA PRO

Cooling bath thermostats for professional temperature control from -100 to 200 °C

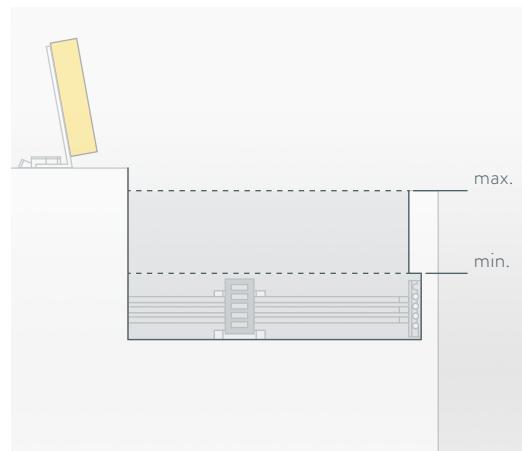

Flexible operation, outstanding performance

With LAUDA PRO, customers gain access to a cutting-edge product line with an outstanding overall concept. There are two operating units available: Base or Command Touch. These can be removed from the thermostat for very high levels of flexibility. On the one hand, this permits remote control of the devices and on the other hand, this considerably reduces the height of the devices. In addition, they are also equipped with a hybrid cooling system as standard. This enables additional cooling of the refrigerating machine with water.

Low device height and 360° accessibility of the bath thanks to detachable remote control

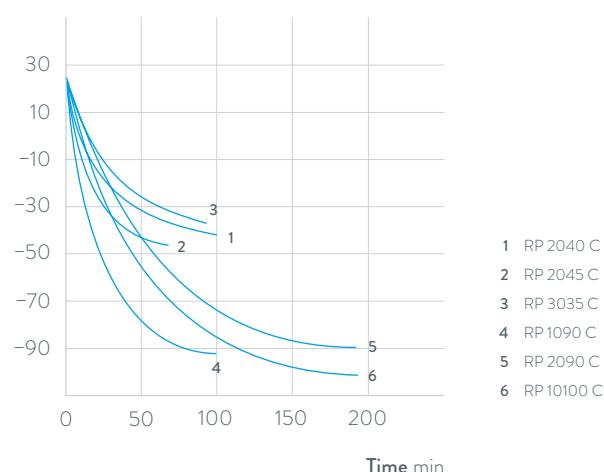

Full functionality of the bath with low minimum fill height

COOLING PERFORMANCE

Heat transfer liquid: Ethanol, bath closed

Bath temperature °C

- 1 RP 2040 C
- 2 RP 2045 C
- 3 RP 3035 C
- 4 RP 1090 C
- 5 RP 2090 C
- 6 RP 10100 C

Important functions

- Internal LAUDA Vario Pump with 8 selectable output levels
- Hybrid cooling of the refrigerating machine permits cooling using ambient air or, in addition, using cooling water
- Standard bath edge heating on all types prevents the formation of ice on the surface of the bath cover

Included accessories

Bath cover, tubing nipples with screw caps for the cooling coil

Further accessories

External pump, interface modules

All technical data and power supply variants can be found in the 'Technical data' section.

More at www.lauda.de/1740

LAUDA PRO

The PRO cooling bath thermostats for internal bath applications offer a working temperature range from -100 to 200°C . A multi-stage adjustable pump ensures excellent homogeneity of the bath. With their bath sizes from 10 to 30 liters and cooling capacity from 0.4 to 1.5 kW, the thermostats are suitable for a wide range of applications.

LAUDA Proline Kryomats

High-performance cooling thermostats from -90 to 200°C
for use in process technology and material testing

-90°C

200°C

High cooling performance and compact design

The Proline Kryomats are cooling thermostats that feature the latest technology with high efficiency and an excellent price-performance ratio. The pressure pump is optimized for internal circulation and can be set to four levels – the standard-issue LAUDA Command remote control also makes it especially user-friendly. Furthermore, integrated bath edge and bath bridge heating prevent the formation of condensation caused by air humidity at low temperatures.

Optimal circulation and temperature distribution throughout the entire bath thanks to an adjustable pump nozzle

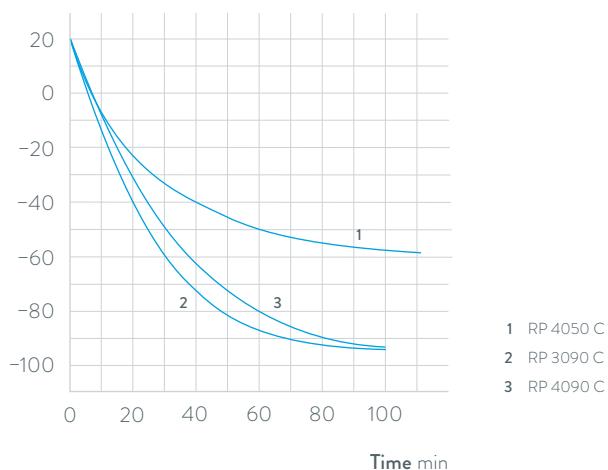

Spacious baths and large bath openings – ideal for bulky test specimens and effective throughput

COOLING PERFORMANCE

Heat transfer liquid: Ethanol, bath closed

Bath temperature $^{\circ}\text{C}$

Important functions

- Removable Command operating unit with high-resolution, graphic LCD screen and individually selectable display functions
- Programmer with 150 temperature/time segments, can be divided into 5 programs
- Pump connections on side and rear, integrated bypass

Included accessories

Bath cover, tubing nipples

Further accessories

Inset baskets, interface modules

All technical data and power supply variants can be found in the [Technical data](#) section.

PROCESS THERMOSTATS

Specific application examples

- Refractometer
- Polarimeter
- Single-use bioreactors
- Extruder for food micro reactors
- Responsive control in chemical/pharmaceutical surroundings
- Climate chambers
- Space simulation
- Electric mobility; battery testing
- Test rigs
- Stress test
- Crystallization regulation
- Freeze-drying
- Micro structures
- Coating plants

LAUDA

LAUDA LOOP

The compact, lightweight circulation thermostat
for external applications from 4 to 80 °C

Extremely versatile, flexibly usable thermo-electric circulation thermostat

The LAUDA LOOP circulation thermostat is sure to impress with its constant temperature range between 4 and 80 °C and astonishing flexibility. Its compact construction and low weight, as well as wide voltage input range of 100 to 240 volts, make it possible to put it to use flexibly and spontaneously anywhere in the world – the ›Plug and Play‹ setup with quick-fit couplings makes it especially easy to use. The intuitive three-button softkey operation and simple menu navigation in five available languages via the well-lit, high-contrast OLED display make using the device a breeze.

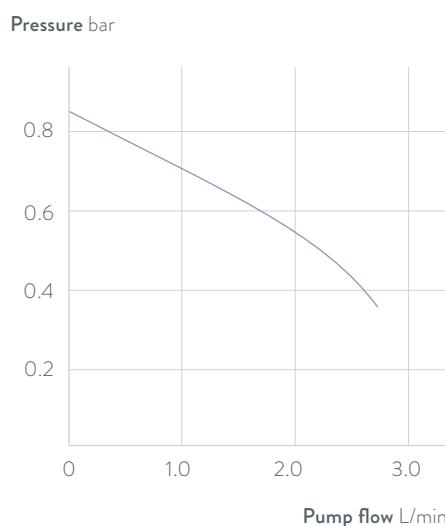

Simple three-button controls with OLED display

Standard-issue RS 232 interface for system integration
into processes

PUMP CHARACTERISTIC Water

Important functions

- Pump connections with quick-fit couplings for easy consumer changes
- Can be operated with non-flammable liquids (water, water/glycol)
- Cooling technology free of coolant ensures silent, low-vibration operation

Included accessories

Hose nozzles for pump connections

Further accessories

Tubing

All technical data and power supply variants can be found in the ›Technical data‹ section.

LAUDA LOOP

The L100 and L250 air-cooled device types achieve a cooling capacity of 120 and 250 watt. The devices are primarily for use at constant temperatures with low power requirements. Both device types are especially energy-efficient and silent in partial-load operation.

LAUDA PRO

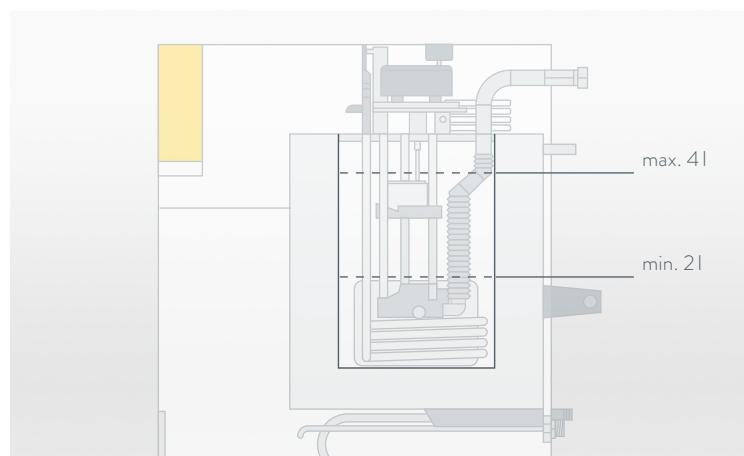

Compact circulation thermostats for professional temperature control from -90 to 250 °C

-90 °C

250 °C

Flexible operation, outstanding performance characteristics

LAUDA PRO is the cutting-edge product line with an outstanding overall concept: Brandnew from LAUDA are the circulation thermostats for external use, with small, active liquid volumes for quick temperature changes. The innovative Base or Command Touch operating units can be detached and used as a remote control. The cooling thermostats come equipped with hybrid cooling as standard, which allows for additional cooling of the refrigerating machine with water.

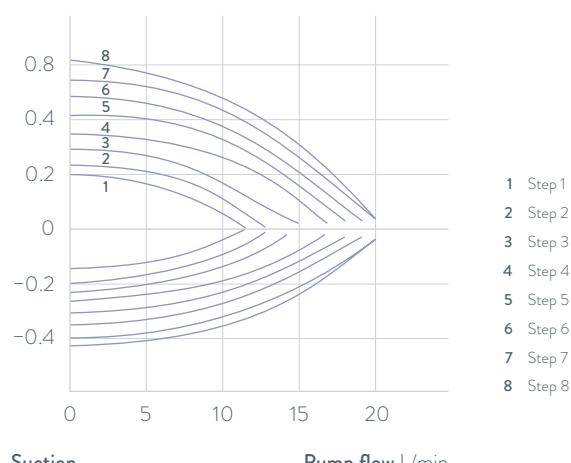

The small filling volume and powerful vario flex pump offer fast temperature changes with low operating costs and material consumption

Low device height and removable remote control unit

PUMP CHARACTERISTICS Water

Pressure bar

Suction

Pump flow L/min

Important functions

- Tower design for small footprint
- LAUDA Vario Flex Pump with 8 available output levels, pump connections at rear
- SmartCool system for digital, energy-saving cooling control including automatic compressor control

Included accessories

Tubing nipples for pumps and cooling water connection

Further accessories

Tubing, interface modules

All technical data and power supply variants can be found in the **Technical data** section.

LAUDA PRO

The PRO heating circulation thermostats are designed for external applications up to 250 °C. The compact construction permits space-saving installation of the thermostats. An integrated cooling coil, fitted as standard, provides cooling. The PRO cooling circulation thermostats are ideal for external applications where rapid temperature changes are required. The cooling output of 0.6 and 0.8 kW or 1.5 kW, combined with a very low filling volume permit these rapid temperature changes.

LAUDA Integral T

Process thermostats for professional external temperature control in the temperature range of -30 to 120 °C

-30 °C 120 °C

High-performance process thermostats for effective control of external temperature control processes

The mobile Integral T process thermostats have an adjustable heating and cooling capacity and small, active internal volume that enables fast temperature changes. The minimized thermal ballast makes it possible to control exothermal reactions or simulate climatic influences, for example. Starting with the T 4600 model, the Integral Ts are equipped with an additional pump for independent internal circulation within the internal loop. An adjustable bypass valve between the inlet and outlet of the external loop also enables a reduction in pressure to protect, for example, pressure-sensitive consumers.

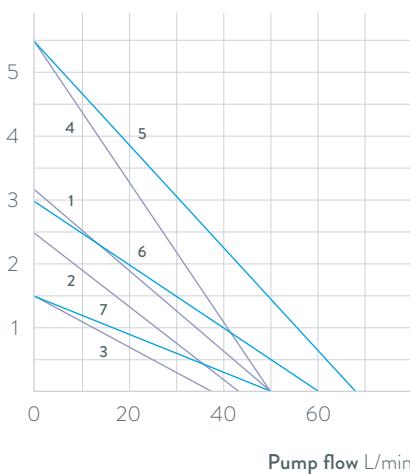

Fold-out control unit with large display and easily accessible interfaces

All devices are equipped with castors

PUMP CHARACTERISTICS Liquid: Kryo 30

Pressure bar

T 2200, T 2200 W
T 4600, T 4600 W

- 1 Bypass closed
- 2 Bypass 2.5 bar max.
- 3 Bypass 1.5 bar max.
- 4 Option high-power pump 5.5 bar
- 5 Bypass closed
- 6 Bypass 3.0 bar max.
- 7 Bypass 1.5 bar max.

T 7000, T 7000 W
T 10000, T 10000 W

Important functions

- Filler nozzle on front, drain tap at the rear
- Small stainless steel bath with large expansion volume
- Programmer with max. 150 segments, 5 program parts
- Automatic proportional cooling with compressor control

Included accessories

Nipples for pump connections

Further accessories

Tubing, 4-port manifold

All technical data and power supply variants can be found in the 'Technical data' section.

More at www.lauda.de/1752

LAUDA Integral T

The T control unit can be easily folded out, making the following interfaces accessible from below: Connector for standby contact input, fault (alarm) contact output, analog inputs and outputs, external Pt100 and serial RS-232-/485 interface.

LAUDA Integral XT

High-performance process thermostats from 1.5 to 18 kW
for temperature control from -90 to 320 °C

Process thermostats for dynamic temperature control tasks

The Integral XT process thermostats operate according to the flow principle with a cold oil blanket that allows the utilization of a wide temperature range through the use of a heat transfer medium. The electronically controlled, magnetically coupled pump can alter the pressure to adapt the flow rate to the relevant process requirements. The Integral XT models can be integrated easily in different process control systems using a wide selection of interface modules.

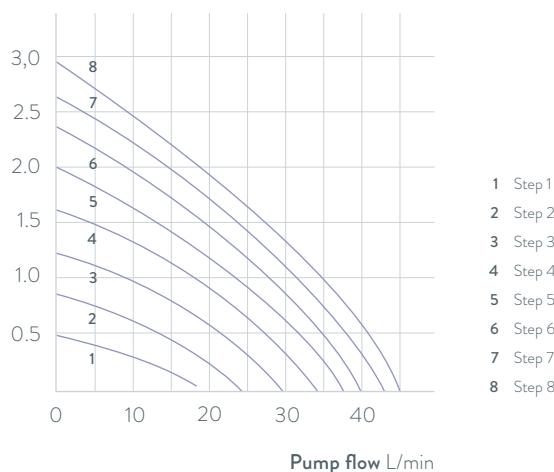

Standard-issue RS 232/485 interface and two other insertion locations for interface modules in the interest of flexible system integration

Simple and intuitive operation thanks to detachable remote control

PUMP CHARACTERISTICS* Water

Pressure bar

- 1 Step 1
- 2 Step 2
- 3 Step 3
- 4 Step 4
- 5 Step 5
- 6 Step 6
- 7 Step 7
- 8 Step 8

Important functions

- High-performance LAUDA Vario Pump (pressure pump) with 8 selectable output levels or flow pressure control
- Retrofittable with up to 2 additional interface modules
- Programmer with 150 temperature/time segments, can be divided into 5 programs
- SmartCool system for energy-saving digital cooling control including automatic compressor control

Included accessories

Command remote control with RS-232/485 interface

Further accessories

Tubing, interface modules, adapter

All technical data and power supply variants can be found in the 'Technical data' section.

More at www.lauda.de/1754

* for all XT (except XT 1850 W / 1850 WS)

LAUDA Integral XT

The process thermostats can be operated easily and intuitively using the detachable Command remote control with plain text menu guidance and graphic display of the temperature profile.

LAUDA Variocool

Cooling circulation thermostats from -20 to $80\text{ }^{\circ}\text{C}$
with cooling capacities up to 10 kW and powerful pumps

-20°C 80°C

Comprehensive spectrum of services for demanding temperature control tasks

The LAUDA Variocool with optional heater is a fully fledged circulation thermostat suitable for use with non-flammable heat transfer liquid within a moderate temperature range.

Equipment incorporating different pumps, individual interface module expansions and the option of external temperature control allow operation as a standalone unit or full integration in a process control system.

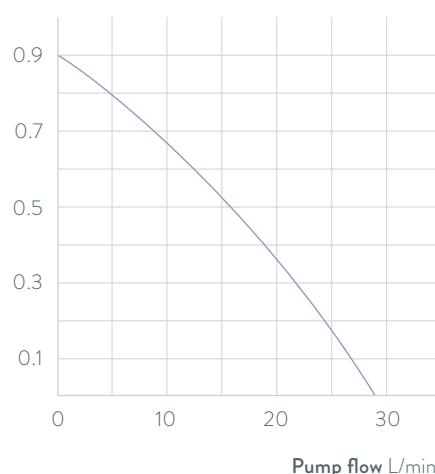

All models are equipped with electronic expansion valve

Flexible customization to applications due to optional heating and high performance pumps

PUMP CHARACTERISTIC Water

Pressure bar

Important functions

- Adjustable bypass for pressure limitation
- Filling opening at the top, drain tap at the rear
- Integrated programmer with 150 segments, can be divided into 5 programs
- Electronic level indicator and low-level alarm
- SmartCool system for digital, energy-saving cooling control, including automatic compressor control

Included accessories

Nipples, screw caps

Further accessories

Hoses, interface modules

All technical data and power supply variants can be found in the **Technical data** section.

More at www.lauda.de/1756

LAUDA Variocool

All models are available in air and water-cooled versions (W) and fitted with moveable as well as fixable castors. High-performance circulation chillers in a tower design starting from the VC5000 model are available with sound insulation.

LAUDA Kryoheater Selecta

Process thermostats from -90 to 200°C

for high-performance, professional temperature control

-90°C

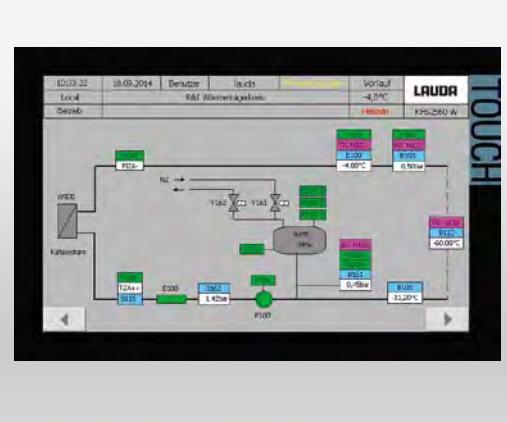

200°C

High-performance temperature control – impressive energy efficiency and reliability

LAUDA process thermostats from the Kryoheater Selecta (KHS) product line are synonymous with high-performance temperature control, long service life, ease of maintenance and intuitive operation. Depending on the lowest required temperature, either a two-level compressor (down to -60°C) or a cascade cooling system (down to -90°C) is used. Condenser cooling is performed using cooling water and is controlled continuously and precisely. An incremental switch offers energy-saving and low-wear partial load operation via automatic compressor control.

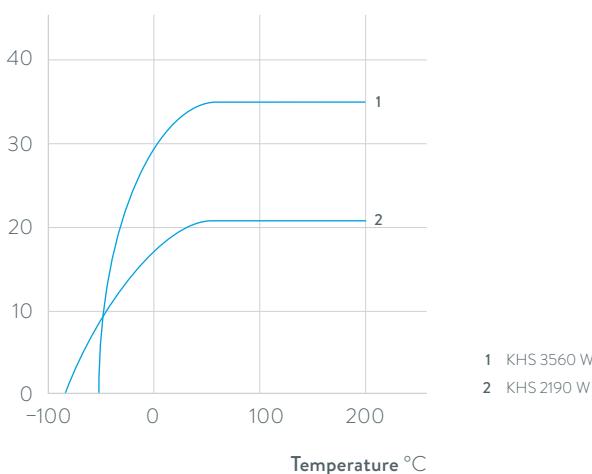

Secure and reliable use in production environment thanks to protection class IP 54 and the durable steel frame construction of the device

SPC controlling with 7" touch panel for intuitive operation and extensive data exchange with process control systems

COOLING POWER Heat transfer liquid: Kryo 65 / Kryo 90

Effective cooling power kW

Important functions

- Powerful, magnetically-coupled pump (high flow rate, even with pressure losses), speed-controlled or with flow pressure control
- Prepared for pressurized nitrogen overlay
- Visualization of pending faults, status display of all system components
- User management
- Free choice of analog or digital interface included in the standard delivery, other optional interfaces also available
- USB port and LEMO connector for external temperature probe as standard

Available accessories

Thermostating and cooling water tubing, adapters

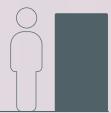

All technical data and power supply variants can be found in the [Technical data](#) section.

More at www.lauda.de/1758

LAUDA Kryoheater Selecta

The Kryoheater Selecta product line consists of the two devices KHS 3560 W and KHS 2190 W, which can be used in chemical and pharmaceutical production. They also perform impressively in simulations of the environmental conditions at inspection stations in the automotive and aerospace industry. The process thermostats are designed for pressurized operation with nitrogen. Benefits include the increase in maximum operating temperature and the extension in service life of the heat transfer liquids.

LAUDA-Noah POU

Thermo-electric process thermostats
for the semiconductor industry from -20 to 90°C

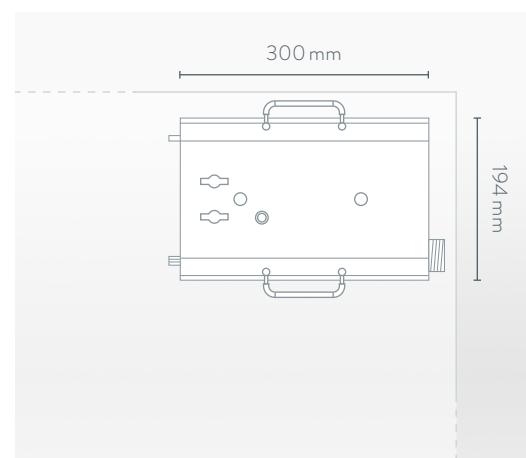

-20°C 90°C

Fast and precise temperature control for demanding processes

The thermoelectric point of use (POU) temperature control system offers reproducible temperature control for plasma etching applications. This system dynamically controls the temperature of the electrostatic wafer chuck (ESC) and can be used in all types of etching processes. The LAUDA-Noah POU thermoelectric temperature control systems are based on established principles of heat transfer used for Peltier elements. These elements allow quick and precise temperature control required for complex processes involved in the manufacture of components progressively getting smaller and smaller in size.

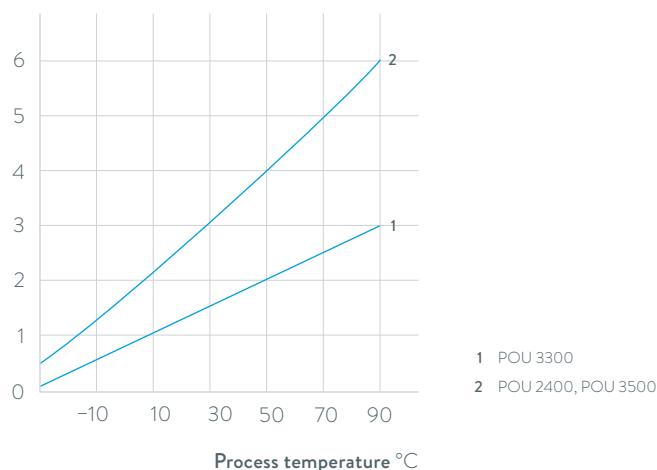

Dynamic, stable temperature control

Small footprint

COOLING POWER dependent on process temperature

Effective cooling power kW

Important functions

- Compressor and refrigerant-free system with low energy consumption
- Smallest footprint in the industry, no footprint required for underfloor installation
- Extremely low volume of heat transfer fluid

Included accessories

Canister with hand pump for filling

Further accessories

Communications modules with remote control function (RS-485 protocol)

All technical data and power supply variants can be found in the **Technical data** section.

More at www.lauda.de/1760

LAUDA-Noah POU

Point of use (POU) temperature control systems can reduce energy consumption by up to 90 % compared to compressor-based systems. Minimal space requirements with the option of underfloor installation at the point of use minimizes cleanroom use.

LAUDA CIRCULATION CHILLERS

Specific application examples

- Rotary evaporators
- Distillation systems
- Spectrometers
- Supply of cooling traps
- Digital printing
- Laser cutting
- Laser sorting
- Point welding
- Injection molding
- Tunnel drilling machines
- Centralized cooling water supply

Circulation chillers

LAUDA Microcool

Circulation chillers for reliable continuous operation in laboratory and research applications from -10 to 40°C

-10 °C 40 °C

Compact circulation chillers with outstanding price-performance ratio

The LAUDA Microcool line of user-friendly circulation chillers consists of four compact models with large LED display and membrane keypad, offering cooling capacities of 0.25 to 1.2 kW. The highlight of these devices is the premium quality centrifugal pump with magnetic coupling – unique to this price category: Magnetic coupling of pump and electric motor prevents any kind of seal issue from arising on the pump shaft, eliminating the chance for any fluid to leak.

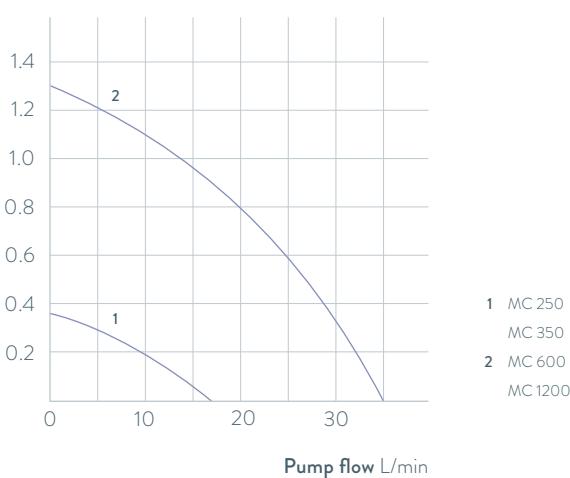

Illuminated viewing glass enables quick identification of the fill level

Standard-issue RS 232 interface and alarm contact

PUMP CHARACTERISTICS Water

Pressure bar

Important functions

- Auto-start timer and auto shutdown function
- Filling opening at the top, drain connection at the rear
- Cooling capacity adapted via solenoid valve control, including automatic compressor control

Included accessories

Nipples, screw caps

Further accessories

Tubing

All technical data and power supply variants can be found in the 'Technical data' section.

More at www.lauda.de/1764

LAUDA Microcool

The compact circulation chiller MC 250 and MC 350 fit effortlessly on a lab bench. Somewhat larger models are also available having 600 and 1200 watts of cooling capacity and which can be positioned on the floor under a lab bench to save space.

LAUDA Variocool

Circulation chillers up to 10 kW from -20 to 40 °C for dissipating heat in laboratories, mini plants and production sites

-20°C 40°C

Comprehensive spectrum of services for demanding temperature control tasks

The LAUDA Variocool circulation chillers impress with their space-saving construction and versatility provided by a wide variety of options. They are simple and convenient to operate via the color TFT display. Other interfaces can be retrofitted to supplement the standard USB interface and alarm contact. Positioned in the front of the device they allow easy access. The working pressure and flow rate can be adapted to the respective requirements in different applications using an integrated bypass and optional pumps to achieve optimum temperature control.

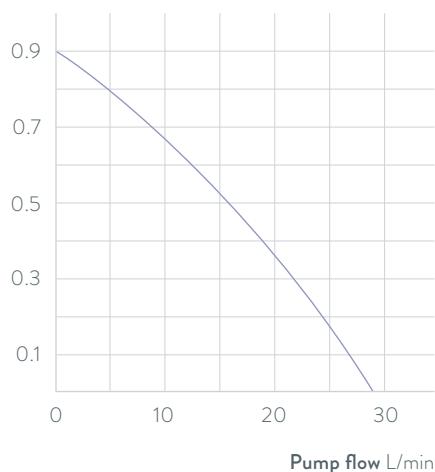

Color TFT display and membrane keypad offer simple and easy adjustment options

Standard-issue USB interface and alarm contact as well as additional optional interfaces that can be retrofitted

PUMP CHARACTERISTIC Water

Pressure bar

Important functions

- Adjustable bypass for pressure limitation
- Filling opening at the top, drain tap at the rear
- Integral programmer
- Electronic level indicator and low-level alarm
- SmartCool system for energy-saving digital cooling control including automatic compressor control

Included accessories

Nipples, screw caps

Further accessories

Hoses, 2-port and 4-port manifold, ball valves, flow monitors and interface modules

All technical data and power supply variants can be found in the 'Technical data' section.

More at www.lauda.de/1766

LAUDA Variocool

All models are available in air and water-cooled versions (W) and fitted with moveable as well as fixable castors. High-performance circulation chillers in a tower design starting from the VC5000 model are available with sound insulation or the option of outdoor installation.

LAUDA Ultracool

Process circulation chillers with cooling capacities of up to 265 kW from -5 to 25 °C for industrial applications

-5°C 25°C

Reliable temperature control and secure operation

Suitable for outdoor installation, the compact LAUDA Ultracool circulation chillers with high cooling capacities are ›Plug & Operate‹ systems with a cold water tank, centrifugal pump and internal bypass. The standard-issue antifreeze protection thermostat prevents freezing of the heat exchanger. Integrated pressure switches also protect the circuit against pressure that is too high or too low and chiller casing made of galvanized steel panels coated with epoxy resin protects against corrosion even in aggressive production environments.

Standard-issue castors for easy positioning at UC Mini

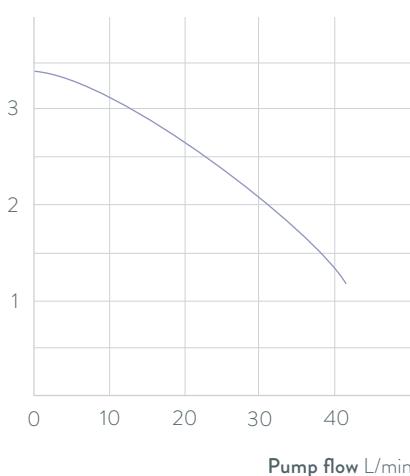

Integrated motor fan speed regulator allows operation in ambient conditions up to -15 °C and reduces the noise level

PUMP CHARACTERISTIC

Standard pumps (3 bar), 50 Hz

Pressure bar

UC 2
UC 4

Important functions

- Premium quality centrifugal pumps, internal bypass
- Water circuit consisting of flexible industrial hoses
- Release valve for draining the circuit

Included accessories

Internal bypass, antifreeze protection thermostat

Further accessories

Tube kits, return valve

All technical data and power supply variants can be found in the ›Technical data‹ section.

LAUDA Ultracool

The UC Mini circulation chillers UC 2 and UC 4 have a cooling capacity up to 4.9 kW. In addition to being more compact, the geometry of the devices guarantees easy access to components requiring regular maintenance. Standard-issue integrated fan control make it possible to operate the UC Midi circulation chiller with low-noise centrifugal pumps and internal bypass for automatic adjustment of water flow at ambient temperatures of -15 °C to 50 °C. The Ultracool Maxi circulation chillers have cooling capacities up to 265 kW and are suitable for outdoor installation.

LAUDA CALIBRATION THERMOSTATS

Specific application examples

- Calibration of thermometers
- Validation of temperature sensors
- Quality testing heat meter

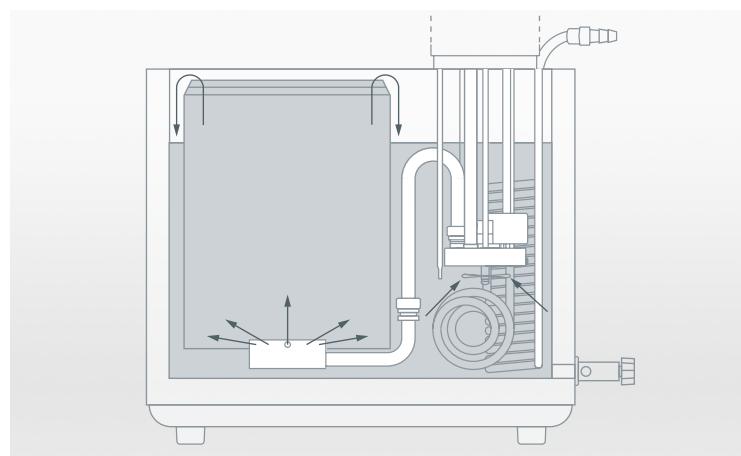

LAUDA Ecoline

Calibration and adjustment of temperatures from
–30 to 200 °C with LAUDA calibration thermostats

High-performance comprehensive solution for calibration and adjustment

LAUDA calibration thermostats provide constant temperature and homogeneity in calibration and adjustment in the test chamber. Depending on the desired size, bath opening and usable depth, different types are available to choose from – each having variable testing chambers, as well as a comprehensive range of products and accessories. The ability of the liquid thermostat to transfer heat through its heat transfer liquid 40 to 60 times better than through air makes it the perfect solution, especially in comparison to heating cabinets and metal block thermostats.

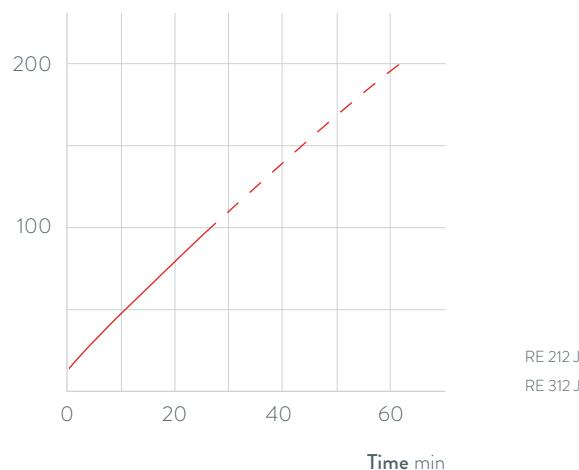

Constant immersion depth thanks to a calibration chamber with overflow principle

Easy handling

HEATING PERFORMANCE Heat transfer liquid: Ultra 240, bath closed

Bath temperature °C

Important functions

- LAUDA Vario pump with five selectable output levels
- Vertical adjustment of the temperature chamber possible
- Stainless steel bath vessel (insulated, with handles and drain tap)
- RS 232 and RS 485 interfaces and analog inputs and outputs
- Automatic adjustment of cooling output
- Programmer

Included accessories

Nipples, screw caps, bath cover

Further accessories

Calibration racks

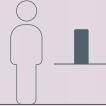

All technical data and power supply variants can be found in the [Technical data](#) section.

More at www.lauda.de/1772

LAUDA Ecoline Staredition

Temperature stabilities up to $\pm 0.01\text{ K}$ at temperatures up to -30°C are achieved with the calibration thermostats of LAUDA Ecoline Staredition. The RE 312 J model is sure to impress with its external temperature probe and comes as standard with the PC software LAUDA Wintherm Plus – like the RE 212 J model, it also offers digital interfaces and a large, double space display as well as a basic programmer.

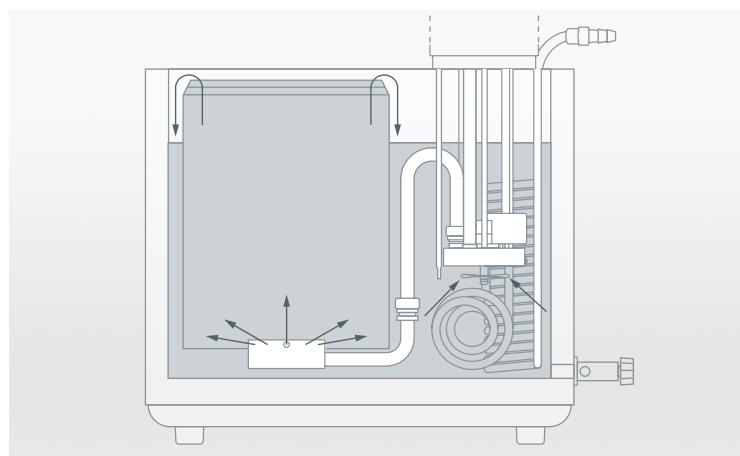

LAUDA Proline

Calibration and adjustment of temperatures from
-40 to 300 °C with LAUDA calibration thermostats

High-performance comprehensive solution for calibration and adjustment

LAUDA calibration thermostats provide constant temperature and homogeneity in calibration and adjustment in the test chamber. Depending on the desired size, bath opening and usable depth, different types are available to choose from – each having variable testing chambers, as well as a comprehensive range of products and accessories.

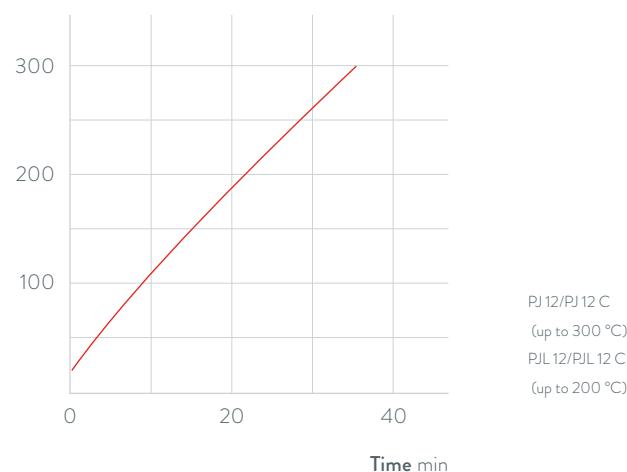

Constant immersion depth thanks to a calibration chamber with overflow principle

Removable remote control for easy and intuitive operation

HEATING PERFORMANCE Heat transfer liquid: Ultra 240, bath closed

Bath temperature °C

Important functions

- Stainless steel bath vessel (insulated, with handles and drain tap)
- Selectable Master control head with LED display or detachable Command operating unit with graphic LCD display
- LAUDA Vario Flex pump (pressure pump) with eight selectable output levels
- PowerAdapt system for optimally adapted max. heating output without influencing the mains power supply

Included accessories

Nipples, screw caps, bath cover

Further accessories

Calibration racks

All technical data and power supply variants can be found in the [Technical data](#) section.

LAUDA Proline

For maximum temperatures up to 300 °C, the compact models of the LAUDA Proline PJ12 and PJ12 C can be used, which can also be specially operated to -40 °C, together with a LAUDA through-flow cooler.

ADDITIONAL EQUIPMENT

Specific application examples

-
- Directly cooling of liquids in heating thermostats
 - Cooling traps

Add. equipment

Heat transfer liquids

Accessories

LAUDA Flow through coolers

Flow through coolers for cooling
heating thermostats up to -30°C

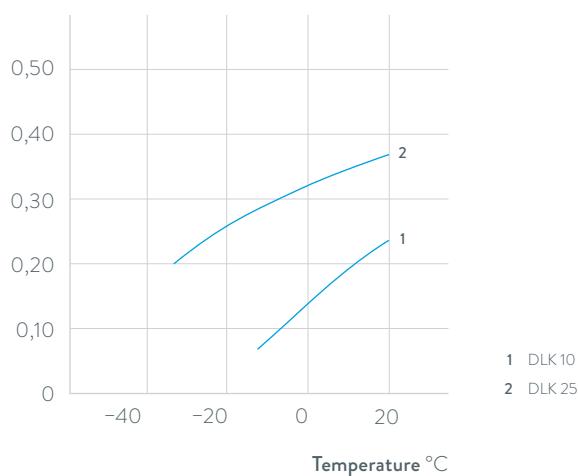

The perfect accessory for heating thermostats

LAUDA flow through coolers make it possible to work at room temperature, since they can be used to add a fully fledged, cooling thermostat to any heating thermostat with pump connections. Flow through coolers guarantee optimal temperature stability at all times and facilitate temperature conditions that can be reproduced anytime, since they replace ecologically unsound and cost-intensive cooling with tap water and allow work to be carried out without having to worry about fluctuations in flow through volumes and temperature of the cooling water.

COOLING POWER Heat transfer liquid: Ethanol

Effective cooling power kW

Important functions

- Largely maintenance-free cooling units with heat exchangers made of stainless steel
- Connection with unscrewable nipples
- Low noise emissions
- No condensation or corrosion thanks to optimum insulation of cooled components

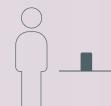

All technical data and power supply variants can be found in the 'Technical data' section.

More at www.lauda.de/1778

LAUDA Flow through coolers

Air-cooled, fully hermetical and therefore mostly maintenance-free cooling units with generously dimensioned heat exchangers are sure to impress with optimal insulation provided by polyurethane foam on all cooled parts in the interior of the flow through cooler – thus preventing condensation and corrosion.

LAUDA Immersion cooler

Immersion cooler for constant cooling to -50°C

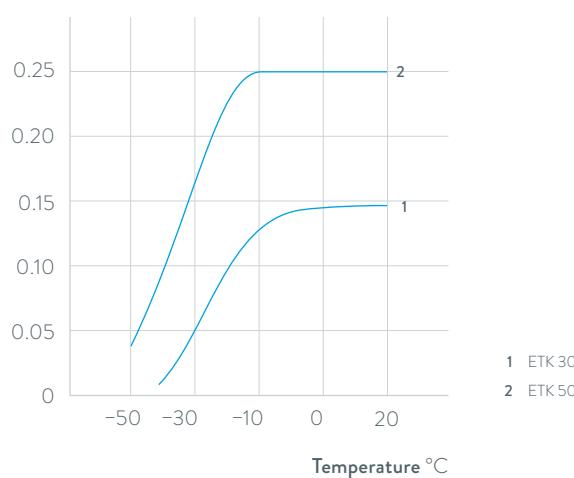

The perfect addition to heating thermostats

LAUDA immersion coolers function using the classic principle of direct evaporation and serve as auxiliary coolers to quickly cool heating thermostats, water baths and cooling traps to temperatures below room temperature. The ETK 50 has its own temperature controller.

COOLING POWER Heat transfer liquid: Ethanol

Effective cooling power kW

Important functions

- Stainless steel cooling coil
- Extremely flexible and well-insulated connecting hose to cold finger
- Injection of coolant directly into the cold finger for optimum efficacy
- Compact, space-saving design

All technical data and power supply variants can be found in the **Technical data** section.

LAUDA Immersion cooler

The compact immersion coolers ETK 30 and ETK 50 are equipped with cooling coils made of premium-quality, stainless steel. When used with heating thermostats, water baths and cooling traps, they facilitate the quick expansion of the temperature range downwards.

LAUDA Heat transfer liquids

For safe and reliable operation
of your thermostats

Highly accurate temperature control at extreme temperatures, reliability and long-term operational stability for a long service life of the thermostats.

The right choice of heat transfer liquid is of critical importance for the safe and reliable operation of thermostats, circulation chillers or water baths. Thanks to our many decades of experience, we are able to offer optimum heat transfer liquids for LAUDA thermostats and other brands. Prices of heat transfer liquids can be found in our price list, which we will gladly send you on request.

LAUDA Accessories

Individual solutions, down to the finest detail

Optimized for your requirements

Operating constant temperature equipment often requires the use of vital accessory components. Only by using the right sampling frames, connecting parts, varied tubing connectors, distributors or interface modules, can applications be smoothly implemented.

LAUDA's comprehensive range of accessories offers you the ideal accompaniment to your complete solution, proven many times over, all from a single source.

Cooling of heating thermostats – Cooling coil sets, solenoid valvecooling water regulation, regulated high-temperature coolers

Level control – Constant level device, automatic filling device, Variocool flow control instrument, separating plate with jet pipe and suction pipe, plunger

Connecting plugs, connecting cables

Bath covers – Stainless steel bath covers, bath cover sets, stainless steel gable covers

Racks, platforms, lifting platforms – Polycarbonate/stainless steel hanging racks up to 100 °C, test tube in polypropylene (up to 95 °C)/stainless steel (up to 150 °C), inserts for calibrating thermostats, lifting platforms, accessories for notch bending test/pour point determination

Hoses – Polymer hoses (insulated/uninsulated), reinforced EPDM hoses, insulating hoses for subsequent insulation, EPDM cooling water hoses, stainless steel hose clips, metal hoses with simple heat/cold insulation/for heat and cold/with multi-layered insulation

Adapters – Pump connector sets, hose connectors, quick couplings for cooling water connection, distributors, Integral XT bypass, ball cocks, screw caps, graphite seals

Additional pumps – Proline Kryomats (ex-works only), booster pump

Interface modules, remote controls – Interfaces, Integral T remote control

Operation and measurement in ex-zones – Command EX i remote control unit, barrier boxes for connection to external temperature sensors

Temperature probes – Platinum resistance thermometers, connecting plugs, connecting cables, compression fittings

Other accessories – Backlight for viscothermostats, bath edge and window heating (ex-works only), castor base with castors /castor sets
